For Vilnius Gediminas Technical University
Students' Representation

Motivational letter

Hello, I am Aistė Adomavičiūtė, Vilnius Gediminas Technical Universitys Building Energy Systems Engineering second year student. I candidate to be the chairperson of Vilnius Gediminas Technical Universitys Environmental Engineering Faculty's student representation.

Even before starting my studies, I knew that i would want to join the student representatives in my faculty. I've always had a strong desire to add my own contributions and to help others. Becoming part of the student representatives gave me a sense of belonging within the university community. It provided me with a meaningful way to focus my energy on improving student life for everyone. I had the chance to share and bring some of my own ideas to life, and it felt fulfilling to see my efforts make a real impact. I also enjoy learning new things and gaining new skills, so I made the most of the autumn and spring training sessions, soaking up as much knowledge as I could. I actively participated in various activities, and I was fortunate to be involved in organizing LAIFAS as well as helping to bring the freshmen camp to life.

To me, it's important that the student union is a space where every student feels they have the opportunity to get involved, express their opinions, and truly be heard. I believe that building a positive and supportive environment within the team, as well as maintaining strong connections with our faculty alumni, can significantly enhance the quality of our work in the student union. In the long run, I'm confident this will have a positive impact on the entire Faculty of Environmental Engineering community..

Kind regards,

Aistė Adomavičiūtė
