To the Student Representation of Vilnius Gediminas Technical University

MOTIVATION LETTER

I, Neida Butrimaitė, am a student of the Faculty of Electronics, studying Cybersecurity and Communication Technologies. I am running for the position of Chair of the Student Representation because I want not only to formally belong to the university, but also to actively participate in its life, contribute to student well-being, and help build a strong and united academic community.

Although my academic journey at the university has only just begun, I am highly motivated to learn, get involved in activities, and grow together with the Student Representation. I quickly adapt to new processes, am not afraid of responsibility, and actively seek opportunities for personal and professional development. I believe that genuine motivation, initiative, and consistent effort are no less important than long-term experience; therefore, I am ready to dedicate my time and energy for the benefit of students.

My experience in volunteering and event organization has provided me with valuable practical skills. While volunteering at the Song Festival, I worked in an intensive and dynamic environment that required quick reactions to changing situations, decision-making, and adaptability. This experience strengthened my sense of responsibility, flexibility, and ability to work effectively under pressure. At school, I actively participated in extracurricular activities—I hosted events, wrote scripts, coordinated their execution, and communicated with guests from other schools and institutions. These activities helped me understand the importance of clear communication, teamwork, and responsibility for shared outcomes. I learned to listen to different opinions, seek compromises, and work toward common goals.

I believe that my sense of responsibility, strong communication skills, ability to work with people, and sincere desire to represent students' interests would allow me to perform the duties of Chair of the Student Representation responsibly and ethically. I am committed to being open to students, listening to their concerns, initiating dialogue, and working together to find solutions that foster a strong, active, and supportive university community.

For a student-driven future!

Neida Butrimaitė
