Student Representation

Motivational letter

Hello, I am Aistė Adomavičiūtė, a second-year student of building energetics systems engineering programme in the Environmental Engineering faculty and I am running for the position of SR EEF chairperson a second time.

When I first ran for this position, I was guided by a very simple but personally important motivation the desire to be active, to contribute, and to genuinely help students. Even before starting my studies, I knew that I wanted to be part of the Students' Representation, and after joining it, I found a space where I could meaningfully dedicate my time, share ideas, and see them turn into real actions.

During my term, which lasted one semester, I gained a lot of valuable practical experience and developed a better understanding of how the Students' Representation works from the inside: what challenges we face, what we do well, and where there is still room for growth. A great deal of motivation and many ideas also came from the Competent Leadership Program, which helped me look more broadly at leadership, teamwork, and the real value we can create for the student community.

This experience is the main reason why I am running for this position for a second time. I liked this role not only as a set of responsibilities, but also as an opportunity to grow personally and to create positive change around me. After my first term, I can clearly see where we can still improve, what we can do more boldly and purposefully, and which initiatives I would like to continue and bring to completion.

It is important to me that the SR is a space where every student feels they can contribute, express their opinion, and be heard. I believe that paying attention to a positive internal atmosphere within the SR, as well as strengthening cooperation with our faculty representatives, can have a positive impact on the entire community.

Kind regards,

Aistė Adomavičiūtė
